<div>OPTIONAL ADDITIONAL BENEFIT RIDER</div> <div>Rider cost for all benefits is 0.60% of Accumulation Value at each contract anniversary during the Surrender Charge Period.</div> <div>This rider cost is taken penalty free and without surrender charges. The optional rider cost, under certain scenarios, may result in loss of premium.</div>	<p>You may elect to add an optional Additional Benefit Rider (for a cost) that provides an additional premium bonus, enhanced penalty-free withdrawals, Additional Payout Benefit, and Return of Premium. This rider is designed to provide flexible choices to fit your individual goals.</p> <ul style="list-style-type: none">• 5% Additional Premium Bonus: Premium bonus increases from 3% to 8% on any premiums received in the first five contract years.• 4% Additional Payout Benefit on Accumulation Value at payout after the surrender charge period. If you elect an annuity payout option after the 14-year surrender charge period has elapsed, a 4% bonus will be added to your Accumulation Value.• Return of Premium: At any time in the third contract year and thereafter, you may terminate the Contract and receive no less than your Contract's Net Premium paid. The Return of Premium feature can serve as a safety net for changes in your financial situation. The Net Premium is equal to your initial and subsequent premiums (less any premium bonus and optional rider cost, if applicable, excluding the Additional Benefit Rider cost) minus any withdrawal amounts you have received (after any surrender charges or Interest Adjustment).• Enhanced Penalty-Free Withdrawals: 10% of Accumulation Value after the first year. Beginning the third year, withdrawals can increase to 20% (maximum) if no withdrawal was taken in the previous year. <p>If you choose the optional Additional Benefit Rider, beginning in the third contract year, penalty-free withdrawals can increase to 20% (maximum) in years in which no withdrawal was taken in the previous year. If any penalty-free withdrawal is taken during a contract year, the penalty-free allowance available for the following year resets to 10%. For example, after the first contract anniversary, if no withdrawals are taken in the second year, the penalty-free allowance increases to 20% in year three. Because a 5% withdrawal is taken in year three, the penalty-free allowance available in year four resets to 10%. If no withdrawals are taken in the following years, the 20% remains available for withdrawal without penalty. In year four no withdrawal was taken, therefore, the penalty-free allowance available in year five increase to 20% and remains available until a penalty-free withdrawal of any amount is taken. Fixed Index Annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although Fixed Index Annuities guarantee no loss of premium due to market downturns, deductions from your Accumulation Value for additional optional benefit riders could under certain scenarios exceed interest credited to your Accumulation Value, which would result in loss of premium. They may not be appropriate for all clients.
