

MNL IncomeVantageSM

Fixed Index Annuity

*Annuities at
their Best[®]*

The Income You Need - The Potential You Want

Like many individuals, you've probably spent years saving for retirement with the goal of having enough money to enjoy life in your retirement years. The challenge is predicting how long your retirement nest egg will need to last. Rising costs, low interest rates, inflation, and the impact of market fluctuation on the assets you were counting on may have left you wondering how to stretch those important retirement assets.

One of the biggest frustrations you may face today is securing a retirement paycheck that's both reliable and big enough to pay the bills. Rather than traditional savings plans or fluctuating market-based products, you may now be looking to guaranteed income plans to meet your needs. You want to ensure that you'll have a reliable retirement income stream and create a plan to guarantee that income for life.

You need secure income, you want growth potential, you deserve peace of mind. The MNL IncomeVantageSM from Midland National[®] Life Insurance Company can provide all three.

This flexible premium Fixed Index Annuity is designed for income for your lifetime through Guaranteed Lifetime Withdrawal Benefit (GLWB) features, but with the added benefit of growth potential from stock-market linked Index Accounts. From the very beginning MNL IncomeVantage contract holders have multiple growth opportunities through a combination of a GLWB Bonus, a GLWB Stacking Roll-Up Credit, and Interest Credits.

Fixed Index Annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. They may not be appropriate for all clients.

Summary of Benefits for MNL IncomeVantage

- Guaranteed Lifetime Withdrawal Benefit (GLWB) feature
 - GLWB Bonus of 5% based on premium received for the first 5 contract years
 - GLWB Stacking Roll-Up Credit
 - 2% of GLWB Value (Compounded Annually)
 - +
 - 150% of the dollar amount of interest credit to Accumulation Value
- Lifetime Payment Amount provides guaranteed lifetime income
- Multiple Index Account Options available
- Tax-deferral, income for life, and full Accumulation Value at death

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Individuals who benefit the most from the MNL IncomeVantage fully utilize the Guaranteed Lifetime Withdrawal Benefit (GLWB) features for future retirement income and avoid taking withdrawals before utilizing the GLWB feature.

Growth potential combined with lifetime income. Experience the income advantage Midland National has to offer – the MNL IncomeVantage.

Products that have bonuses may offer lower credited interest rates, lower Index Cap Rates, lower Participation Rates, and/or greater Index Margin than products that don't offer a bonus. Over time and under certain scenarios the amount of the bonus may be offset by the lower credited interest rates, lower Index Cap Rates, lower Participation Rates, and/or greater Index Margin.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Benefits of Owning a Deferred Annuity

Tax-Deferral

Tax-deferred growth allows your money to grow faster because you earn interest on dollars that would otherwise be paid in taxes. Your premium earns interest, the interest compounds within the Contract and the money you would have paid in taxes earns interest. This chart details the potential of a tax-deferred annuity.

May Avoid Probate

By naming a beneficiary, you may minimize the delays, expense and publicity often associated with probate. Your designated beneficiary receives death proceeds in either a lump sum or a series of income payments. Please consult with and rely on your own legal or tax advisor.

Under current law, annuities grow tax-deferred. An annuity is not required for tax-deferral in qualified plans. Annuities may be subject to taxation during the income or withdrawal phase. Neither Midland National®, nor any agents acting on its behalf, should be viewed as providing legal, tax or investment advice. Consult with and rely on your own qualified advisor.

The Power of Tax-Deferral

The chart is a hypothetical example of tax-deferral and assumes an initial premium of \$100,000 earning 4.00% compounded annual rate of return for 15 years. It is not intended to predict or project performance. *The tax-deferred value less taxes represents the increase in value, due to tax-deferral, less taxes at an assumed rate of 33% with no surrender charge or Market Value Adjustment applied.

Understanding Your Income Opportunity

The MNL IncomeVantage is designed to generate guaranteed lifetime income through the Guaranteed Lifetime Withdrawal Benefit (GLWB) feature. This feature ultimately guarantees that a specified amount, the Lifetime Payment Amount, can be withdrawn each contract year for the life of the annuitant, even if the Accumulation Value and the GLWB Value are both reduced to zero and provided no excess withdrawals are taken.

Let's Start by Defining Your Accumulation Value

Once you purchase your annuity, an Accumulation Value is established. Your Accumulation Value is equal to 100% of premium, plus any fixed and index account interest credited. Your Accumulation Value will be reduced by the amount of any withdrawals, but cannot decrease due to negative index performance. The Accumulation Value is used to determine your Surrender Value, Death Benefit, any Nursing Home Confinement Waiver benefit and withdrawals before utilizing the GLWB benefit.

For detailed information on charges incurred if the contract is surrendered, see the Surrender Charge section on the Product Details sheet.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

GLWB Value

The GLWB Value is used as the basis for calculating Lifetime Payment Amounts (LPAs) which can provide lifetime income. This value is used only in determining Lifetime Payment Amounts and not as the basis for calculating the Accumulation Value, Death Benefit or other withdrawals from the contract.

GLWB Bonus

A 5% GLWB Bonus will be applied to the GLWB Value on all premiums received in the first five contract years.

GLWB Stacking Roll-Up Credit

In addition to the GLWB Bonus, a GLWB Stacking Roll-Up Credit may be added to the GLWB Value during the first 20 contract years and it compounds annually. On each contract anniversary during the first 20 contract years, the current GLWB Value may be increased by 2% of the GLWB Value plus 150% of the dollar amount of any interest credited to the Accumulation Value. The GLWB Stacking Roll-Up Credit only applies if no withdrawals are taken in the contract year. The GLWB Value is ultimately used to calculate your Lifetime Payment Amount.

The GLWB Bonus and GLWB Stacking Roll-Up Credit do not apply to the Accumulation Value or Death Benefit. The GLWB Stacking Roll-Up Credit applies to the GLWB Value in the first 20 contract years and does not apply if a withdrawal is taken (RMD excluded) during the year or after Lifetime Payments are elected.

How Do I Calculate My Guaranteed Lifetime Withdrawal Benefit Value?

- 100% of Premiums (including subsequent premiums)
- + Plus... GLWB Bonus
- + Plus... Stacking Roll-Up Credits
- Minus... Withdrawals from contract (if applicable)

- = **GLWB Value**

GLWB Value Example

The following example shows a 5% GLWB Bonus, Interest Credit, and a GLWB Stacking Roll-Up Credit in the first two years.

	Accumulation Value Beginning of Year	GLWB Bonus	GLWB Value Beginning of Year	Interest Credit to Accumulation Value End of Year	GLWB Stacking Roll-Up Credit Amount End of Year	GLWB Value End of Year
Year 1	\$100,000	\$5,000	\$105,000	2% Interest Credit on \$100,000 = \$2,000	2% of GLWB value of \$105,000 = \$2,100 <i>plus</i> 150% of the dollar amount of interest credited to the Accumulation Value = \$3,000 Equals \$5,100	\$105,000 + <u>\$5,100</u> \$110,100
Year 2	\$102,000	\$0	\$110,100	1% Interest Credit on \$102,000 = \$1,020	2% of GLWB value of \$110,100 = \$2,202 <i>plus</i> 150% of the dollar amount of interest credited to the Accumulation Value = \$1,530 Equals \$3,732	\$110,100 + <u>\$3,732</u> \$113,832

In contract years when a withdrawal is taken, the GLWB Stacking Roll-Up Credit will not apply, unless the withdrawal is used to satisfy a Required Minimum Distribution (RMD). Once you elect to take Lifetime Payment Amounts, GLWB Stacking Roll-Up Credits will no longer be credited to the GLWB Value.

These interest credit percentages shown are not guarantees or even estimates of the amounts you can expect from your annuity; actual results may be higher or lower. This chart is a hypothetical example and is not intended to predict future performance.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Income Opportunity - Stacking Roll-Up Example

The MNL IncomeVantage offers a powerful opportunity of Stacking Roll-Up benefits to help build your Lifetime Payment Amount (LPA).

Index performance varies over time and the MNL IncomeVantage with its built-in stacking roll-up credit helps the GLWB Value continue to grow. The following bar chart shows examples of the LPA at the end of three different 10-year periods of index returns for the S&P 500® Low Volatility Daily Risk Control 5% Index; the most recent 10-year period, the lowest 10-year growth period (out of the last 20 years), and the highest 10-year growth period (out of the last 20 years). This chart also shows the guaranteed LPA at the end of 10 years assuming no Interest Credits. The increased potential of the GLWB Stacking Roll-Up Credit is shown as an annual effective rate at the top of each growth period. As you can see, even in the lowest growth period, the LPA has increased in value due to the stacking roll-up. In the example below, the Stacking Roll-Up Credit is expressed as annual effective rate based on 150% of the dollar amount of interest credited.

These hypothetical examples are based on the following assumptions:

- Single Annuitant Age: 60 at issue
- Initial Premium: \$100,000
- GLWB Bonus on Initial Premium: 5%
- GLWB Stacking Roll-Up Credit: 2% of GLWB Value plus 150% of the dollar amount of interest credited to Accumulation Value
- Allocation: 100% S&P 500® Low Volatility Daily Risk Control 5% Index, Annual Point-to-Point with 1.85% Margin
- Level LPA option is elected
- Lifetime Payment Percentage at age 70 is 5.75%
- Lifetime Payment Amounts shown are annual
- Assuming no withdrawals are taken

Hypothetical Example

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Flexible Income

As you look for ways to achieve greater control and flexibility over your retirement income, wouldn't it be comforting to have options to meet your future income needs? You can begin taking Lifetime Payment Amounts based on the GLWB Value after the first contract year and as early as age 50.

Lifetime Payment Amounts

You choose how frequently you receive your Lifetime Payment Amounts: monthly, quarterly, semi-annually or annually. When you first elect Lifetime Payment Amounts, your payments will be based on your current GLWB Value multiplied by a percentage based on the annuitant's age and LPA Option elected (Lifetime Payment Percentage, or LPP, see chart on the Product Details Sheet). Payments can be started and stopped at any time. If a Required Minimum Distribution (RMD) is required, you will be allowed to take the greater of the Lifetime Payment Amount or the RMD.

Thereafter, on each contract anniversary, your Lifetime Payment Amount may increase based on the Lifetime Payment Percentage that applies to the annuitant's current age, LPA Option elected and current GLWB Value. This may positively impact future Lifetime Payment Amounts. Future payments will not decrease so long as you don't withdraw more than this amount in any contract year.

Your Lifetime Payment Percentage is determined by the attained age of the annuitant and LPA Option elected. For joint annuitants, Lifetime Payment Percent is based on attained age of youngest annuitant.

Electing Lifetime Payment Amounts

After your 50th birthday, the MNL IncomeVantage fixed index annuity provides you two choices for taking lifetime payments.

Level Lifetime Payments

This option provides a level payment amount for either the rest of your lifetime or the joint lifetime of you and your spouse. Any excess withdrawals that you may choose to take from your MNL IncomeVantage annuity's accumulation value will reduce your future lifetime payments by a proportional amount.

Increasing Lifetime Payments

This option starts at a lower initial payment amount than the level payment option, but has the possibility of increasing each year, based on the average interest credited to your fixed and index accounts.

You will need to notify us in writing to begin receiving your Lifetime Payment Amounts. Once Lifetime Payment Amounts begin, GLWB Stacking Roll-Up Credits will no longer be applied. For tax treatment of Lifetime Payment Amounts please see your tax advisor. Under current tax law, income payments from MNL IncomeVantage may be taxed as ordinary income. Additionally, if taken before 59½, income payments may be subject to 10% IRS penalty.

See the Product Details sheet for Lifetime Payment Percentages (LPPs).

Impact of Withdrawals

If you intend on taking withdrawals before utilizing the GLWB feature you will not experience the full benefit of this annuity. Your GLWB Value will be reduced for any withdrawals taken either before or after Lifetime Payment Amounts begin. Withdrawals other than Lifetime Payment Amounts will cause your GLWB Value to be reduced by the same percentage withdrawn from your Contract, which may represent a larger dollar amount than withdrawn. Withdrawals taken to satisfy Required Minimum Distributions (RMDs) will reduce the GLWB Value by the dollar amount withdrawn, instead of the percentage withdrawn. Excess withdrawals may be subject to surrender charges and Market Value Adjustments (if applicable) and will ultimately impact your future Lifetime Payment Amounts.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Demonstrating Impact of Credits and Withdrawals

The following example demonstrates how the GLWB Bonus, GLWB Stacking Roll-Up Credit, Penalty-Free Withdrawals of the Accumulation Value, Lifetime Payment Amount (LPA) withdrawals, and excess withdrawals impact the Accumulation Value (AV) and GLWB Value. (The following example assumes 100% allocation to the index account options.)

Calculating Values	Accumulation Value	GLWB Value
 <p>At Issue: At age 62, Mary purchases a contract with \$100,000.00 and receives the 5% GLWB Bonus. When the Contract is issued, only the GLWB Value receives the 5% bonus.</p>	<p>Initial Premium \$100,000.00 (premium)</p>	<p>5% GLWB Bonus \$100,000.00 (premium) + 5% (GLWB Bonus) \$105,000.00 (GLWB Value)</p>
In Year One:		
<p>Assuming there are no additional premiums and the Contract earns a 2% Interest Credit or \$2,000.00 for the year, Mary's new Accumulation Value is \$102,000.00. Mary's GLWB Value receives the GLWB Stacking Roll-Up Credit of 2% of the GLWB Value plus 150% of the dollar amount of the Interest Credit to the AV for a total of \$5,100.00 and is now \$110,100.00.</p>	<p>Interest Credit \$100,000.00 (AV) + 2% (Interest Credit) \$102,000.00 (AV)</p>	<p>GLWB Stacking Roll-Up Credit \$105,000.00 (GLWB Value) + 2% (of GLWB Value) \$107,100.00 (GLWB Value) \$107,100.00 + \$3,000.00 (150% of the \$ Amount of Interest Credit to AV) \$110,100.00 (GLWB Value)</p>
Impact of Penalty-Free Withdrawals		
In Year Two:		
<p>Let's assume Mary elects to take a 5% penalty-free withdrawal of the AV in year two. Because LPA withdrawals have not yet begun, the withdrawal will reduce the GLWB Value by the same percentage (5%) as it reduces the AV. So the AV will reduce by \$5,100.00 and GLWB by \$5,505.00.</p>	<p>Withdrawal \$102,000.00 (AV) - 5% (Withdrawal) \$96,900.00 (AV)</p>	<p>Withdrawal \$110,100.00 (GLWB Value) - 5% (Proportional Withdrawal) \$104,595.00 (GLWB Value)</p>
<p>Let's assume Mary earns a 2% Interest Credit in year two. The Interest Credit percentage is applied to the AV, increasing the AV by \$1,938.00. Because a withdrawal was taken, no GLWB Stacking Roll-Up Credit will apply to the GLWB Value.</p>	<p>Interest Credit \$96,900.00 (AV) + 2% (Interest Credit) \$98,838.00 (AV)</p>	
In Year Three:		
<p>Mary takes no withdrawals and earns no Interest Credits. Because no withdrawals were taken and LPA withdrawals have not yet begun, the GLWB Value is again eligible for the 2% Stacking Roll-Up Credit, plus 150% of the dollar amount of Interest Credit to the Accumulation Value increasing the GLWB Value by \$2,091.90.</p>		<p>GLWB Stacking Roll-Up Credit \$104,595.00 (GLWB Value) + 2% (of GLWB Value) \$106,686.90 (GLWB Value)</p>

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Demonstrating Impact of Credits and Withdrawals Continued

Lifetime Payment Amount	Accumulation Value	GLWB Value
In Year Four:		
Mary is now 65 and elects to begin level LPA withdrawals. The LPA will be the current GLWB Value multiplied by the Lifetime Payment Percentage (LPP). At age 65, the LPP for a single payout is 5.25%, so Mary's LPA to \$5,601.06.		Lifetime Payment Amount \$106,686.90 (GLWB Value) x 5.25% (LPP) ----- \$5,601.06 (LPA)
The AV and GLWB Value are reduced dollar-for-dollar by the LPA. Because Mary selected the Lifetime Payment Election Date and LPA withdrawals have begun, the GLWB Value is no longer eligible for the GLWB Stacking Roll-Up Credit.	Lifetime Payment Amount \$98,838.00 (AV) - \$5,601.06 (LPA) ----- \$93,236.94 (AV)	Lifetime Payment Amount \$106,686.90 (GLWB Value) - \$5,601.06 (LPA) ----- \$101,085.84 (GLWB Value)
Impact of Excess Withdrawals		
In Year Five:		
Mary decides to take a partial surrender of \$10,000.00 of the AV, which is considered an excess withdrawal because the withdrawal amount exceeds the LPA. The excess withdrawal is the difference between the LPA and the withdrawal from the AV.	Excess \$10,000 (Withdrawal) - \$5,601.06 (LPA) ----- \$4,398.94 (Excess)	
Since LPA's have begun, the AV and GLWB Value are first reduced dollar-for-dollar by the LPA.	Lifetime Payment Amount \$93,236.94 (AV) - \$5,601.06 (LPA) ----- \$87,635.88 (AV)	Lifetime Payment Amount \$101,085.84 (GLWB Value) - \$5,601.06 (LPA) ----- \$95,484.78 (GLWB Value)
At this stage, we must determine by what % the excess withdrawal will reduce the remaining AV. This is determined by dividing the excess amount by the current AV.	% of Excess \$4,398.94 (Excess) ÷ \$87,635.88 (AV) ----- 5.02% (% of Excess)	
The AV is reduced by the amount of the excess withdrawal and the GLWB Value is reduced by the same percentage (5.02% or \$4,793.34) that the excess withdrawal reduced the AV.	Excess 87,635.88 (AV) - \$4,398.94 (Excess) ----- \$83,236.94 (AV)	Excess \$95,484.78 (GLWB Value) - 5.02% (% of Excess) ----- \$90,691.44 (GLWB Value)
In Year Six:		
At the beginning of year six, Mary is age 67. Because an excess withdrawal occurred in the previous contract year, the LPA is recalculated at 5.45%, based upon Mary's current age and current GLWB Value. Mary's new LPA is \$4,942.68.		Lifetime Payment Amount \$90,691.44 (GLWB Value) x 5.45% (LPP) ----- \$4,942.68 (LPA)

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Choose Your Index Options

There are two main aspects that factor in determining the Interest Credits; the Index Account (crediting method) and the specific index.

You have total control over how your initial premium is allocated between our Fixed Account or Index Accounts. Midland National offers several Index Account options that can be used to calculate Interest Credits including Daily Average, Monthly Point-to-Point, Monthly Average, Annual Point-to-Point, and an Inverse Performance Trigger. These

crediting methods allow you to select from several different indexes noted in the index options chart on the Product Details sheet. Each of these Index Account options performs differently in various market scenarios. It is important to note that the fixed account interest is never applied to premium allocated to the Index Accounts. *Please refer to the "How it Works-Crediting Methods" brochure for more information on the differences.*

The MNL IncomeVantage offers a Variety of Index Options Including:

S&P 500® INDEX	This index has been widely regarded as the best single gauge of the large cap U.S. equities market since the index was first published in 1957. The index includes 500 leading companies in leading industries of the U.S. economy.
S&P 500® LOW VOLATILITY DAILY RISK CONTROL 5% INDEX	The S&P 500® Low Volatility Daily Risk Control 5% Index strives to create stable performance through managing volatility (i.e. risk control) on the S&P 500 Low Volatility Index. The S&P 500 Low Volatility Index measures performance of the 100 least volatile stocks in the S&P 500. The index adds an element of risk control by applying rules to allocate between stocks, as represented by the S&P 500 Low Volatility Index, and cash. The Index is managed to a 5% volatility level.
S&P 500® LOW VOLATILITY DAILY RISK CONTROL 8% INDEX	The S&P 500® Low Volatility Daily Risk Control 8% Index strives to create stable performance through managing volatility (i.e. risk control) on the S&P 500 Low Volatility Index. The S&P 500 Low Volatility Index measures performance of the 100 least volatile stocks in the S&P 500. The index adds an element of risk control by applying rules to allocate between stocks, as represented by the S&P 500 Low Volatility Index, and cash. The Index is managed to an 8% volatility level.
S&P MIDCAP 400® INDEX	The S&P MidCap 400® provides investors with a benchmark for mid-sized companies. The index seeks to remain an accurate measure of mid-sized companies, reflecting the risk and return characteristics of the broader mid-cap universe on an on-going basis.
DOW JONES INDUSTRIAL AVERAGE™ INDEX (DJIA®)	Dow Jones Industrial Average™ Index – The oldest continuing stock market index, the DJIA® is one of the most well known and widely followed indicators of the U.S. stock market in the world. It is represented by 30 of the largest U.S. stocks, including household names and leaders in their respective industries.
NASDAQ-100® INDEX	The Nasdaq-100® index includes 100 of the largest domestic and international non-financial securities listed on The Nasdaq Stock Market based on market capitalization. The index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology.
LBMA GOLD PRICE INDEX (LBMA Afternoon (PM) Gold Price)	The LBMA is an international trade association, representing the London market for gold and silver bullion which has a global client base. The "LBMA Gold Price" is administered by ICE Benchmark Administration (IBA). IBA hosts an electronic auction process for the LBMA Gold Price. The price is set twice daily (at 10:30 and 15:00 London GMT) in US dollars.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Crediting Methods

Daily Average with Index Margin	Daily Average	This method for determining any Interest Credit uses a Daily Average calculation to determine a percentage gain or loss in the Index Value during your reset period. This is done by comparing the difference between the Index Value on the first day of the contract year and the Daily Average Index Value during the year (usually 252 trading days), subject to an Index Margin. The Interest Credit will never be less than zero.
	Index Margin	Once a gain has been calculated using the Daily Average Index Account option, an Index Margin is subtracted. The Index Margin is guaranteed for the first year, but can change each year thereafter at the Company's discretion. The Index Margin is set in advance each contract year, however at no time will it be greater than the maximum Index Margin for the Daily Average Index Account.
Monthly Average with Participation Rate	Monthly Average	This method for determining any Interest Credit is calculated by comparing the Index Value on the first day of the contract year to the Monthly Average Index Value. The Monthly Average Index Value equals the sum of the monthly index values over the contract year, excluding the beginning Index Value on the first day of the contract year, divided by 12. The Interest Credit is credited annually. On each contract anniversary this change, multiplied by the Participation Rate, is used to determine the Interest Credit for that year. The annual Interest Credit will never be less than zero.
	Participation Rate	Once a gain has been calculated using the Monthly Average Index Account option, a Participation Rate is applied. The Participation Rate is a percentage that is multiplied by the gain at the end of the contract year and is used to determine the Interest Credit to your contract. The Participation Rate is guaranteed for the first contract year, and can change each year thereafter on the contract anniversary. The Participation Rate is declared each year at the Company's discretion. The Participation Rate is set in advance each contract year, however at no time will it fall below the minimum Participation Rate for the Monthly Average Index Account.
Monthly Point-to-Point with Index Cap Rate	Monthly Point-to-Point	This method for determining any Interest Credit uses the monthly changes in the Index Value, subject to a monthly Index Cap Rate. The Interest Credit is credited annually and is based on the sum of all the monthly percentage changes in the index value—which could be positive or negative. On each contract anniversary, these monthly changes, each not to exceed the monthly Index Cap Rate, are added together to determine the Interest Credit for that year. Negative monthly returns have no downside limit and will reduce the Interest Credit, but the Interest Credit will never be less than zero.
	Index Cap Rate	Your annuity applies an Index Cap Rate, or upper limit, to calculate your Interest Credits each year for the Monthly Point-to-Point. This cap, which is applied monthly, may change annually. The Index Cap Rate will be declared on each contract anniversary and is guaranteed for that year. The Index Cap Rate is set at the Company's discretion, however, at no time will this cap ever fall below the minimum guaranteed Index Cap Rate set for the Monthly Point-to-Point index account option.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Crediting Methods (continued)

Annual Point-To-Point with <ul style="list-style-type: none"> • Index Cap Rate • Index Margin 	Annual Point-To-Point	<p>This calculation method measures the change in index value using two points in time; the beginning index value and the ending index value for that year. Index linked gains are calculated based on the difference between these two values. The index growth, if any, is then subject to an Index Cap Rate and/or Index Margin. The annual Interest Credit will never be less than zero.</p>
	Index Cap Rate	<p>Your annuity applies an Index Cap Rate, or upper limit, to calculate your Interest Credits each year applied to the Annual Point-to-Point Index Account option. This cap, which is applied annually and may change annually. It is declared on the contract anniversary and is guaranteed for that year. The Index Cap Rate is set at the Company's discretion. However, at no time will this cap ever fall below the minimum guaranteed Index Cap Rate set for the Annual Point-to-Point index account option.</p>
	Index Margin	<p>Once a gain has been calculated using the Annual Point-to-Point Index Account option, an Index Margin is subtracted. The Index Margin is guaranteed for the first year, but can change each year thereafter at the Company's discretion. The Index Margin is set in advance each contract year, however at no time will it be greater than the maximum Index Margin for the Annual Point-to-Point Index Account.</p>
Two-Year Point-to-Point with Index Margin	Two-Year (also known as Term) Point-to-Point	<p>This calculation method measures the change in index value using two points in time; the beginning index value and the ending index value for that two-year term. Index linked gains are calculated based on the difference between these two values. The Index growth, if any, is then subject to an Index Margin. The Interest Credit will never be less than zero.</p>
	Index Margin	<p>Once a gain has been calculated using the Two-Year Point-to-Point Index Account option, the annual Index Margin is multiplied by two (which is the term length) and is subtracted from the gain. An annual Index Margin is set at the beginning of each two-year term and is guaranteed for that term. The Index Margin can change at the start of each new term at the Company's discretion, however at no time will it be greater than the maximum Index Margin for the Two-Year Point-to-Point Index Account.</p>
Inverse Performance Trigger	Inverse Performance Trigger (or Annual Declared Rate Negative Performance Option)	<p>The Inverse Performance Trigger is based on the S&P 500®. The S&P 500® Index Value from the beginning of your contract year is compared to the Index Value at the end of the contract year. If the ending S&P 500® Index value is equal to or less than the starting value, the money allocated to this option will be credited interest at the Declared Performance Rate. If the ending Index Value is greater than the beginning Index Value, the money allocated to this option will receive a zero percent (0%) Interest Credit.</p>
	Declared Performance Rate	<p>This method for determining any Interest Credit applies a Declared Performance Rate of interest when the Index Value stays the same or goes down throughout the year. This Declared Performance Rate may change annually, and it will never fall below the minimum guaranteed rate. The Declared Performance Rate is set each year at the Company's discretion.</p>
Fixed Account	<p>Premium allocated to the Fixed Account will be credited interest at a declared Fixed Account interest rate and is credited daily. The initial premium interest rate is guaranteed for the first contract year. For each subsequent contract year, we will declare, at our discretion, a Fixed Account interest rate that will apply to the amount allocated to the Fixed Account as of the beginning of that contract year. A declared Fixed Account interest rate will never fall below the minimum guaranteed fixed account interest rate.</p>	

Ask your sales representative for the current rates, minimum Participation Rates, Index Cap Rates, maximum Index Margins, Declared Performance Rate, and Fixed Account Interest Rate.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Annual Reset

A key advantage to Fixed Index Annuities is the annual reset feature. This feature applies to all of the crediting methods for the MNL IncomeVantage. The annual reset feature allows Interest Credits, if any, to be added to your Index Accounts on each contract anniversary. This can benefit you because that amount—when added—becomes “locked-in” and cannot be taken away due to negative index performance. The “locked-in” Interest Credit will be added to the Accumulation Value, giving you the advantage of compounding interest in subsequent years.

This feature also resets your starting index value each contract anniversary. This can help minimize your risk when the index experiences a severe downturn. Without this feature, you would have to wait for the index value to climb up to its original level before any Interest Credit could be realized.

Transfer Options

After the first contract year and on an annual basis for all Annual Crediting Methods, or after the second contract year and every two years for the Two-Year Point-to-Point Crediting Method, you may elect to transfer between crediting methods and Index Account options, including the fixed account. Based on current tax laws, transfers between options will not be taxable or subject to surrender penalties. *Please refer to the MNL IncomeVantage Additional Benefits Specifications Page, found in your contract, for minimum transfer amounts.*

Subsequent Premium

All subsequent premiums will be credited a fixed interest rate. We will declare this interest rate for each subsequent premium at the time that subsequent premium is received. The interest rate applicable to each subsequent premium is guaranteed until the end of the Contract Year. On each Contract Anniversary, Midland National will allocate any premiums received since the prior Contract Anniversary among the accounts, according to your most recent instructions.

Surrender Charges and Market Value Adjustments

If you choose to withdraw money from your contract there are several factors to consider. For additional withdrawals outside of the penalty-free allowance, taken before the end of the surrender charge period, surrender charges and Market Value Adjustment may apply.

Withdrawals will be taxed as ordinary income, and if taken before age 59½, may be subject to a 10% IRS penalty. Withdrawals from your contract will also reduce your Accumulation Value accordingly.

Surrender Charges

Surrender charges allow the Company to invest your money on a long-term basis and generally credit higher yields than possible with a similar annuity of shorter term. During the surrender charge period, a surrender charge is assessed on any amount withdrawn, whether as a partial or full surrender, that exceeds the penalty-free amount applicable and may result in a loss of premium. Additional premiums deposited into existing contracts will maintain the surrender charge schedule set forth at policy issue date. Certain payout options may incur a surrender charge. Market Value Adjustments apply during the surrender charge period.

See the surrender charge schedule which details the declining charges on the Product Details sheet.

Market Value Adjustment may be positive or negative.

A surrender during the surrender charge period could result in a loss of premium. Surrender charge structure may vary by state. Consult your Annuity Disclosure Statement for details specific to your state.

Surrender Value

The Surrender Value is the amount that is available at the time of surrender. The Surrender Value is equal to the Accumulation Value, subject to the Market Value Adjustment, less applicable surrender charges, and state premium taxes. The Surrender Value will never be less than the minimum requirements set forth by state laws, at the time of issue, in the state where the contract is delivered.

The Surrender Value will not be less than 87.5% of all premiums; less any partial surrenders (after Market Value Adjustment or reduction for surrender charges); accumulated at 1.00%.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

Market Value Adjustment **(Also known as Interest Adjustment)**

Your Contract also includes a Market Value Adjustment feature—which may decrease or increase your surrender value depending on the change in interest rates since your annuity purchase. Lower interest rates at time of issue may result in less opportunity for a positive Market Value Adjustment in future contract years. In certain rate scenarios at the time of issue, it may not be possible to experience a positive Market Value Adjustment.

Due to the mechanics of a Market Value Adjustment feature, the Surrender Value generally decreases as

interest rates rise or remain constant. Likewise, when interest rates decrease enough over a period of time, the Surrender Value generally increases. However, the Market Value Adjustment is limited to the interest credited to the Accumulation Value.

This adjustment is applied only during the Surrender Charge period to surrenders exceeding the applicable penalty-free allowance.

See the “Understanding the Market Value Adjustment” brochure for more information.

Market Value Adjustment is not available in Virginia.

Other MNL IncomeVantage Benefits

Annuity Payout Options **(Different than GLWB Feature)**

Should you decide to receive an annuity payout from your annuity after the surrender charge period, you will have several income options from which to choose. Annuity payout options are a benefit of annuities, but are not a requirement with the MNL IncomeVantage. Once a payout option is elected it cannot be changed and all other rights and benefits under the annuity end.

On non-qualified plans, a portion of each income payment represents a return of premium that is not taxable, thus reducing your tax liabilities.

The GLWB feature of this annuity will terminate upon electing an annuity payout option.

See the Product Details sheet for more information on Annuity Payout Options.

Penalty-Free Withdrawals

After the first contract anniversary, a penalty-free withdrawal (also known as a Penalty-Free Partial Surrender), of up to 5% of the Accumulation Value may be taken each year. After the Surrender Charge period, Surrender Charges, and a Market Value Adjustment no longer apply to any withdrawals.

If you take a withdrawal it will result in a reduction of your Accumulation Value and GLWB Value.
Please review the GLWB feature section for details on how penalty-free withdrawals may impact lifetime payment amounts.

Death Benefit

Upon death of the annuitant or owner, Midland National will pay out the Accumulation Value as the Death Benefit to your beneficiary provided no payout option has been elected. The Death Benefit for the MNL IncomeVantage also includes any Interest Credits for a partial contract year based on the date of death. Therefore, the Death Benefit your beneficiaries receive also reflects the Interest Credits for the partial year up through the date of death. The calculation will vary depending on the Index Account Option in which the premium is allocated at the time of death.

Your beneficiary may choose to receive the payout in either a lump sum or a series of income payments. If joint annuitants are named, the Death Benefit will be paid on the death of the second annuitant. If joint owners are named, the Death Benefit will be paid on the death of the first owner.

The GLWB Bonus is not applicable to the Accumulation Value, so it is not included in the Death Benefit. The GLWB Value is not available as a Death Benefit.

This section is for your reference only. It does not need to be returned to Midland National.

This brochure is not complete and must be presented with the Product Details sheet that describes issue ages, bonus, surrender charges, riders, and more.

This brochure is for solicitation purposes only. Please refer to your Contract for any other specific information. With every contract that Midland National® Life Insurance Company issues there is a free-look period. This gives you the right to review your entire Contract and if you are not satisfied, return it and have your premium returned. Fixed Index Annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. They may not be appropriate for all clients. The MNL IncomeVantageSM is primarily designed for future income and may not be appropriate for clients who do not plan to utilize the GLWB feature or who intend to take withdrawals before utilizing the GLWB feature.

Premium taxes: Accumulation Value will be reduced for premium taxes as required by the state of residence.

Refer to your Contract for complete details. The MNL IncomeVantage is issued on form AC/AS139A (certificate/contract), AR153A, AR156A, AR163A-1, AR192A, AR194A (AR151A04 in CA), AR227A, AR245A, AR277A, AS139A END, AR320A, and AR278A (riders/endorsements) or appropriate state variation by Midland National Life Insurance Company, West Des Moines, IA. This product, its features and riders may not be available in all states.

Special Notice Regarding The Use Of A Living Trust As Owner Or Beneficiary Of This Annuity.

The use of living trusts in connection with an annuity contract can be a valuable planning mechanism. However, a living trust is not appropriate when mass-produced in connection with the sale of an insurance product. We strongly suggest you seek the advice of your qualified legal advisor concerning the use of a trust with an annuity contract.

Neither Midland National, nor any agents acting on its behalf, should be viewed as providing legal, tax or investment advice. Consult with and rely on a qualified advisor. Under current law, annuities grow tax-deferred. Annuities may be subject to taxation during the income or withdrawal phase. The tax-deferred feature is not necessary for a tax-qualified plan. In such instances, you should consider whether other features, such as the Death Benefit, lifetime annuity payments, and any riders make the Contract appropriate for your needs.

MNL IncomeVantageSM 10 Product Details

GLWB VALUE	The GLWB Value is used as the basis for calculating Lifetime Payment Amounts (LPAs) which can provide lifetime income. This value is used only in determining Lifetime Payment Amounts and not as the basis for calculating the Accumulation Value, Death Benefit or other withdrawals from the Contract.																																																																																																																																																																																																								
GLWB BONUS	A 5% GLWB Bonus will be applied to the GLWB Value on all premiums received in the first five contract years.																																																																																																																																																																																																								
GLWB STACKING ROLL-UP CREDIT	<p>In addition to the GLWB Bonus, a GLWB Stacking Roll-Up Credit may be added to the GLWB Value during the first 20 contract years and it compounds annually. On each contract anniversary during the first 20 contract years, the current GLWB Value may be increased by 2% of the GLWB Value plus 150% of the dollar amount of any interest credited to the Accumulation Value. The GLWB Stacking Roll-Up Credit only applies if no withdrawals are taken in the contract year. The GLWB Value is ultimately used to calculate your Lifetime Payment Amount.</p> <p>The GLWB Bonus and GLWB Stacking Roll-Up Credit do not apply to the Accumulation Value or Death Benefit. The GLWB Stacking Roll-Up Credit applies to the GLWB Value in the first 20 contract years and does not apply if a withdrawal is taken (RMD excluded) during the year or after Lifetime Payments are elected.</p>

MNL IncomeVantageSM 10 Product Details

The MNL IncomeVantageSM 10 is issued on form AC/AS139A (certificate/contract), AR153A, AR156A, AR163A-1, AR192A, AR194A, (AR151A04 in CA), AR227A, AR245A, AS139A END, AR320A, and AR277A and AR278A (riders/endorsements) or appropriate state variation by Midland National[®] Life Insurance Company, West Des Moines, IA. This product, its features and riders may not be available in all states.

Fixed Index Annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. They may not be appropriate for all clients. The MNL IncomeVantage 10 is primarily designed for future income and may not be appropriate for clients who do not plan to utilize the GLWB feature or who intend to take withdrawals before utilizing the GLWB feature.

The “S&P 500[®]”, “S&P 500[®] Low Volatility Daily Risk Control 5% Index”, “S&P 500[®] Low Volatility Daily Risk Control 8% Index”, “S&P MidCap 400[®]”, and “DJIA[®]” Indices (“Indices”) are products of S&P Dow Jones Indices LLC or its affiliates (“SPDJI”) and have been licensed for use by Midland National Life Insurance Company (“the Company”). Standard & Poor’s[®] and S&P[®] are registered trademarks of Standard & Poor’s Financial Services LLC (“S&P”) and Dow Jones[®] is a registered trademark of Dow Jones Trademark Holdings LLC (“Dow Jones”). The trademarks have been licensed to SPDJI and have been sublicensed for use for certain purposes by the Company. MNL IncomeVantage 10 (“Product”) is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, “S&P Dow Jones Indices”). S&P Dow Jones Indices does not make any representation or warranty, express or implied, to the owners of the MNL IncomeVantage 10 or any member of the public regarding the advisability of investing in securities generally or in this Product particularly or the ability of these Indices to track general market performance. S&P Dow Jones Indices only relationship to Midland National with respect to these Indices is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices and/or its licensors. The Indices are determined, composed and calculated by S&P Dow Jones Indices without regard to Midland National or the Product. S&P Dow Jones Indices has no obligation to take the needs of the Company or the owners of this Product into consideration in determining, composing or calculating these Indices. S&P Dow Jones Indices is not responsible for and have not participated in the determination of the prices, and amount of the MNL IncomeVantage 10 or the timing of the issuance or sale of this Product or in the determination or calculation of the equation by which the Product is to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices has no obligation or liability in connection with the administration, marketing or trading of the Product. There is no assurance that investment products based on these Indices will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.

S&P DOW JONES INDICES DOES NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF THESE INDICES OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. S&P DOW JONES INDICES MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY MIDLAND NATIONAL, OWNERS OF THE MNL INCOMEVANTAGE 10, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDICES OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR AGREEMENTS BETWEEN S&P DOW JONES INDICES AND THE COMPANY, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

The Nasdaq-100[®], Nasdaq-100[®] Index and Nasdaq[®] are trademarks of the Nasdaq Stock Market Inc. (which with its affiliates are the “Corporations”) and are licensed for use by Midland National. The Product(s) have not been passed on by the Corporations as to their legality or suitability. The MNL IncomeVantage 10 is not issued, endorsed, sold or promoted by the Corporations. THE CORPORATIONS MAKE NO WARRANTIES AND BEAR NO LIABILITY WITH RESPECT TO THE MNL INCOMEVANTAGE 10.

The Gold Price Index Option credits interest based on the change in the price of gold per troy ounce in US Dollars as established by the London Bullion Market Association (LBMA) Afternoon (PM) Gold Price and administered by the ICE Benchmark Administration (IBA). The LBMA Afternoon (PM) Gold Price is available at the website <http://www.lbma.org.uk/pricing-and-statistics>. We reserve the right to add, remove or revise availability of the Gold Price Index Option, or to substitute a different widely published benchmark for the price of gold for the use in the Gold Price Index Option. The Gold Price Index Option does not constitute a purchase of or direct investment in gold.

All references to the London Bullion Market Association (LBMA) prices are used with their permission and have been provided for informational purposes only. The LBMA accepts no liability or responsibility for the accuracy of the prices or the underlying product to which the prices may be referenced.
